

Matthew Hallada

WORK EXPERIENCE

CareFirst (*Federal Employee Program Operations Center*) Reston VA and Washington DC

Tech Lead, DX Run Team

August 2023 - September 2024

Tech lead role as part of the DX Run Team. Work was centered around ensuring production stability and performance for health care applications serving millions of customers. We investigated spikes in response time and p90 performance on a weekly basis for two important member-facing applications. Production issues were triaged with infrastructure, networking and dba support teams. Supported on call developers who handled sev 3 issues related to member experience.

Career Break

March 2022 - Mar2023 Kyoto, Japan

Spent a year in Japan studying Japanese at the Kyoto Institute of Culture and Language (京都文化日本語学校), achieving intermediate level (中級, N3).

Angular Software Engineer, DX Agile Scrum team

Jan 2020 - Mar 2022

Worked in an agile scrum team tasked with upgrading our Angularjs Application to Angular 8. Worked heavily with testers and internal security teams to achieve 508 compliance on mobile devices. Team followed a Jenkins deployment pipeline with Jira, Splunk, and Github version control with Ansible playbooks for app configuration.

Sev 3 Java Software Engineer, DX Run Team

March 2018 - March 2022

Production Sev 3 on call support with application upgrade and analysis role. We responded to production issues from partners, performed log monitoring with Splunk and responded to batch failures or issues with partner communications. I engaged in Java Spring back end development for email campaigns, reporting batch applications and built ad hoc reports for our directors office and internal BAs. Reports were done with Java, Spring batch and Hibernate based reporting applications for scheduled reports and custom db2 queries for ad hoc requests. In addition, I was in charge of the internal workspace setup guides for the run team and onboarding of new team members.
